

**PEAK**  
ELEVATING INNOVATION

**PLASTIC PRODUCT DELIVERY MADE EASY**

- Concept, Design and Quote capabilities
- Rapid Prototyping
- Materials Engineering, Tooling and Production
- Supply Chain Solutions

**PROFESSIONAL SERVICES**

Peak's Professional Services offers you the ability to leverage cutting edge capabilities no matter what your needs. Have an idea? Peak can help you develop and produce it. Have a production or supply chain issue? No problem. Our professionals will show you where you can save significant costs. With in-house design, compounding, tooling, rapid prototyping and production capabilities, Peak has the answer for your plastic needs.

**Concept, Design and Quote (CDQ)**

Peak has extensive experience in working with the most critical plastics and packaging formulations. From your 2-D or 3-D concepts, Peak can model, quote and build the necessary tooling in-house to achieve your vision.

**Rapid Prototyping**

Peak offers rapid prototyping capabilities to dramatically reduce your time to market, control product risk and optimize the use of your engineering talent. Peak can provide proof of concept parts in a matter of days for engineering evaluations. Prototype quantities in the designated end material can be provided in short order to ensure you meet your product announcement goals.

**Materials / Compounding**

Special plastic needs? Peak has worked with some of the most demanding and sophisticated customers in the world to formulate a number of unique plastics meeting strength, cost, precision, electrostatic, heat, weight and other requirements.

**Tooling and Production**

Whether with a design in hand, or via our CDQ process, our precision tooling capabilities makes Peak the perfect partner. We have unequalled in-house tooling capabilities which have produced thousands of tooling sets over the last two decades.

**Supply Chain**

With our worldwide JIT system, Peak can help you streamline your production processes by placing critical plastic intermediate goods and packaging within easy reach of your operations. Our creative supply chain and IT experts can assist in optimizing all facets of your plastics supply chain logistics.
